

Opportunities — publish one from the award

WHAT IT IS

The award we just created pays for ten studentships. Each becomes an **opportunity** — a real posting with a title, a supervisor, a research area, an eligibility rule, an open/close window, and a link back to the award that funds it. In this chapter we create one, fill in a supervisor, publish it, and land on the page an applicant would see. Opportunities are the seam between money and people.

THE CLICKS

01 Open the opportunities list

WHERE Sidebar → **Recruitment** (megaphone icon) → **Opportunities** tab (or top-of-page toolbar).

DO Land on the list.

SEE Existing opportunities as rows: title, supervisor, close date, application count, status pill.

SAY *“Every studentship we’re recruiting for is here. I’m going to add a new one against the award I just created.”*

02 Start a new opportunity

WHERE Top-right → **+ New opportunity** button.

DO Click. Form drawer opens.

SEE Fields: funded_by (award link), title, description, supervisor, research_area, eligibility, open_date, close_date, headcount, remote/on-site.

SAY *“Every opportunity has to link back to the award that funds it — no unfunded postings by accident.”*

03 Link it to our award

WHERE First field: **Funded by**.

DO Type or pick EP/Z000000/1 · CDT in Applied AI · Cohort 2027. Autocomplete filters as you type.

SEE A chip appears with the award reference. Studentship remaining count updates: **9 remaining** (was 10).

SAY *“Ten studentships on the grant, one now allocated. Nine left. The system won’t let me over-commit.”*

04 Fill the posting

WHERE Rest of the form.

DO Type:

Title — PhD in Explainable Reinforcement Learning

Supervisor — pick Dr. Elena Ford (existing supervisor record)

Research area — Machine Learning (inherited from award, editable)

Eligibility — UK / EU / International. First-class or 2:1 honours in CS, Maths, or Physics. English test if not native.

Open date — today

Close date — six weeks out

Headcount — 1

Mode — On-site

SEE Every required field ticks green.

SAY *“The supervisor is a real person — the platform checked they're active and have headroom against their cap.”*

05 Save as draft, then publish

WHERE Bottom of the drawer.

DO Click **Save as draft** first. Row appears with grey "Draft" pill. Then reopen and click **Publish**.

SEE Status pill flips to green "Open". A public URL appears in the detail panel.

SAY *“Draft while I'm iterating — nothing goes public. Publish and it's live for applicants.”*

THE LINE

“The award funded it, the platform posted it. The moment we publish, the outside world enters the arc.”
