

AI — Meeting brief · click the button, read the brief, read the evidence

WHAT IT IS

Before every supervisor-student meeting, the platform assembles a typed evidence structure — last meeting date, agreed actions, changes since, open flags — and hands it to the AI narrator, which writes a two-sentence brief in colleague voice. Grounding forbids any date or figure not in the evidence; anything the model can't ground falls back to a plain template. Beside the paragraph, three rule-based questions to open the meeting with. **Not shipped by any other PGR system.** In this chapter we open Priya's brief (built from every action we've done in earlier chapters), read it aloud, and cross-check the evidence.

THE CLICKS

01 Open Priya's record

WHERE Sidebar → **Students** → **Priya Nair**.

DO Look top-right, next to the "Back to students" link.

SEE Grey secondary button: ■ **Prepare for meeting**.

SAY *“Every supervisor walks in cold — “so, where were we?” This is the answer, written before they open the door.”*

02 Click the button

WHERE The button.

DO Click. Right-side drawer slides in.

SEE Reasoning trace with four icons — ■■ record → ■ compare → =■ write → ■ lay out.

SAY *“Opening the record, comparing then and now, writing the brief, laying it out. Every step is real work.”*

03 Read the brief

WHERE Top of the drawer — tinted card labelled "The brief".

DO Read the paragraph aloud. Then point at the "What you agreed last time" callout below.

SEE Paragraph names Priya by first name, addresses "you" the supervisor. Every date and figure appears in the evidence.

SAY *“The paragraph is the reading. The evidence beside it is the citation. Grounding is a mechanical check — if a number isn't in the evidence, the model can't put it in the prose.”*

04 Cross-check one figure

WHERE Pick a specific number in the paragraph (e.g. "12 weeks ago").

DO Point at it. Then find the same figure in the "Changes since" or "Last meeting" evidence beside.

SEE Same figure — prose left, evidence right.

SAY *“If I claim a date and it's not in the evidence, the grounded check fails and the paragraph doesn't render. That's the guarantee.”*

“No other PGR system has this. It's the feature the demo remembers.”
